

Reflect:

Watch what students do and ask these questions:	What kind of experience can grow from these answers?
1. Where do students go inside the classroom? Why do these spaces matter to them?	
2. What pop culture events are capturing students' attention? Why?	
3. What are students building or creating during the school day? Is it productive? Can it influence learning? How?	
4. Scribe a student conversation. What was it about? How much emotion did it generate? Why?	
5. What do students like to do during unstructured play? How can this be leveraged during school?
